

# Introducing THE ALL-NEW G SERIES WHEEL LOADERS

THESE LOAD MOVERS JUST HIT THE GROUND RUNNING... READY FOR ACTION

## AUTOMATED BUCKET CONTROL

Simplify operations with features like:

- "RETURN-TO-DIG"
- "RETURN-TO-TRAVEL"
- "HEIGHT CONTROL"

## BEST-IN-CLASS BREAKOUT FORCE

From 20,000 lbs. (521G) to over 56,000 lbs. (1121G), providing the power you need whether you're moving dirt and gravel or loading a hopper or truck.

## MULTIPLE LINKAGE OPTIONS

Includes XT, Z-bar and extended reach Z-bar models. The XT tool carrier allows better visibility down to the bucket /attachment and also provides parallel lift (keeping material level during loading and unloading). The commonly chosen Z-bar linkage provides the greatest breakout force for strong, powerful digging and complete bucket fill.

## 5-SPEED TRANSMISSION AND POWERINCH

Optional 5-speed PowerShift transmission with lock-up torque converter provides faster acceleration and roading speeds up to 25 miles per hour. PowerInch helps maintain high RPMs maximizing hydraulic power to the loader arms & bucket cylinder, and provides incredible accuracy in tight loading areas.

## MULTIPLE AXLE OPTIONS

Standard limited slip axles (ideal for soft, slippery conditions) automatically transfer torque from slipping tire to gripping tire, ensuring proper traction. Optional heavy-duty axles with auto-locking front differential are ideal for applications on paved or hard pack surfaces.

## G-SERIES LINE-UP

See back for cab details.

The G Series was engineered to provide solutions that exceed industry standards and satisfies the needs of owners, fleet managers and operators.

# AUTOMOTIVE FEEL INDUSTRIAL PERFORMANCE

## LOAD-SENSING HYDRAULICS (4 POWER MODES)

You can easily match engine output to the task at hand with the touch of a button:

- **ECO** for maximum fuel efficiency
- **STANDARD** for quick loading
- **MAX** for aggressive digging
- **AUTO** for engine output that responds on the fly

## MEMBRANE KEYPAD

(Replaces rocker switches)

The touch of a button controls multiple functions and allows the operator to program detents (e.g., height control, return to dig) from within the cab.

## BLUETOOTH SATELLITE RADIO (Overhead)

This system also comes with a USB/iPod connector and phone charger.

## IMPROVED JOYSTICK STEERING

Symmetrical to loader controls, this system gives the operator greater comfort and control.

## 3 ERGONOMIC SEAT OPTIONS

All adjustable to accommodate a wide range of operators.

## BEST-IN-CLASS VISIBILITY

The cab utilizes a single piece of glass, providing improved sunshade and wider wiper coverage. External mirrors are more ergonomically placed to avoid operator fatigue.

One of the best HVAC systems in the industry.

## PREMIUM HEATED AIR-RIDE SEAT (OPTIONAL)

The heated air-ride seat is available with active suspension and dynamic dampening.

## ADDED COMFORT AND IMPROVED ERGONOMICS

The G Series all-new cab is engineered for superior comfort, practical innovation and intuitive technology.

In addition to the points above, the 8" LCD MULTIFUNCTION color monitor with optional integrated rear-view camera provides anti-glare high resolution for greater control and easier access to many of the loader functions.

Plus, the new ergonomically designed joystick steering system provides a symmetrical operating station to control loader functions and machine steering. This helps reduce fatigue, especially during repetitive, high-production applications.

Covered by the industry's most complete protection plan.
